size: 36 - 46

High-quality shoes, padded tongue and ankle bandage, HYDROGUARD membrane ensures waterproofing.

G3358

measurements

Choosing the right size is essential for footwear. Unfortunately, there is no uniform size chart. The final size of the finished shoe can slightly vary among the individual by individual manufacturers depending on design, the production process and material composition.

For this reason, it is best to follow the recommended length of the foot for the size given in the table for each model of our shoes, where an allowance of 0.5 cm is added for low-shoes and 1 cm for ankle and higher shoes.

1. put on the socks you will usually wear in your shoes.
2. stand on a sheet of paper with your heel perpendicular to the wall.
3. then use a pen and ruler to draw a line just in front of your longest toe.
4. measure the distance between the wall and the line you just drew.
5. select the appropriate size.

sizing
