DESCRIPTION

This winter softshell jacket with a hood, made from ElasticTech®Flexi stretch fabric, is designed for work and active movement in cold weather. The functional 5,000/5,000 membrane provides reliable protection against adverse weather whilst maintaining optimal breathability. The jacket's insulation, featuring a lining and a back thermal panel, ensures excellent thermal insulation. During strenuous physical activity, you'll appreciate the underarm ventilation zips with mesh lining, which effectively wick away excess heat. The ergonomically designed 3D Silhouette COMFORT FIT cut with raglan sleeves supports natural movement without restriction. The jacket features a stand-up collar and a detachable hood with adjustable drawcords, and is fitted with a full-length zip with a chin guard. The sleeves and bottom hem of the jacket are finished with elasticated cuffs. The practical pocket layout includes 2 front zipped pockets, a zipped chest pocket, a zipped pocket on the left sleeve and 2 inner chest pockets integrated into the lining. Decorative darts and contrasting panels in an original design enhance the collection's modern style. Reflective elements are positioned on functional parts of the garment to ensure increased visibility when working in low-light conditions.

This personal protective equipment is in conformity with the requirements of the following harmonised standard:

ČSN EN ISO 13688:2013 – Protective clothing - General requirements
